

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country voyage in their RV. Recently retired, after spending several years working with his brother to assemble their crane business into an industry leader, John had no idea that fatefull trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road trip.

Whilst on their journey, John spent time conversing with past business acquaintances whom the Groves stopped to visit along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered an infinite market for a product that could promptly and safely lift people in the air to accomplish maintenance and other building services.

After their return from holiday, John set up a joint venture with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the simple design essentials of that original lift into current models.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has expanded itself into many different global marketplaces and continues to cultivate contemporary machinery to guarantee that clients are able to become safer and more efficient within their workplace.
