

Barrel Clamps

Barrel Clamps - Referred to as "Barrel Clamp", this hydraulic accessory is utilized on lift trucks in order to compress items which you need to transfer using the forklift. Usually, they're used so as to paper rolls, barrels, and handle kegs, together with some barrel clamp designs having the ability to rotate the load. For example, the rotate function allows a lift truck operator to put in a vertically stored paper inside the horizontal intake of a printing press.
